Bringing better health to more patients.

Boehringer Ingelheim BioXcellence™, one of the world's largest manufacturers of biopharmaceuticals, has brought its over 30 years' experience into China. As the first multi-national pharmaceutical company to establish manufacturing operations based on mammalian cell-culture technology in China, Boehringer Ingelheim is committed to supply world-class quality biopharmaceuticals to the global market, and looks forward to better serving patients via its newly established manufacturing capabilities in Shanghai, China.

Creating real customer value.

- We are a leading contract manufacturer with more than 35 years of experience in mammalian and microbial host systems
- Our outstanding product track record of more than 25 commercial biopharmaceuticals produced for the global market gives you confidence for your product development
- We have successfully transferred and optimised more than 150 biopharmaceutical projects, you can step in at any stage
- We offer to you flexible scale biopharmaceutical cGMP production in multi-product facilities approved by the major authorities
- In Shanghai, we provide full range services to our customers, from DNA to Fill & Finish and from clinical up to commercial supply. We simplify outsourcing and care for our customer success.

Work with us in China.

- In May 2017, Boehringer Ingelheim inaugurated its commercial production site for biopharmaceuticals in Shanghai, China.
- Since 2014, Boehringer Ingelheim China Biopharmaceuticals has been operating its cGMP clinical material supply at 100 L and 500 L scales. With the new facility inauguration, the site is capable to operate for clinical and commercial supply up to 2,000 L single-use bioreactor scale. It is designed to flexibly add additional 2,000 L single-use bioreactors and fill & finish capabilities to meet increasing market demand.
- With its global network of biopharmaceutical production sites in Biberach (Germany), Vienna (Austria), Fremont (USA) and now Shanghai, the contract manufacturing business Boehringer Ingelheim BioXcellence™ is well positioned to fulfil strongly increasing demands of the biopharmaceutical industry for innovative products – both in China and worldwide.
